

# BD Vacutainer®

## Product Training

At BD, we pledge to continually support the healthcare professional's need for high quality educational tools and training assistance with our value-added programs.

### Convenience with you in mind.

Our instructional product modules are designed to aid in training healthcare professionals on BD Vacutainer® and BD Microtainer® specimen collection products. You can train at your own speed and have easy access 24/7, from work or home. A built-in knowledge check quiz will help to reinforce your key learnings. Plus, upon completion of the product module, you can print a personalized certificate for your training records.

All product training modules can be accessed at:
