TUMOR MARKERS METHOD CONVERSION: RE-BASELINE PERIOD 9/11-11/10/2023

In preparation of the upcoming Chemistry instrumentation and methodology change for tumor marker testing on November 11, 2023, CompuNet will begin its re-baseline period starting September 11, 2023. It is strongly recommended that clinicians re-establish baseline tumor marker levels on the new method for AFP, CEA, CA 125, CA 15-3 and CA 19-9 during this time as values from different assay methods and instruments are not interchangeable. For any testing ordered during this re-baseline period, the laboratory will automatically perform and report results from the current and new platforms to help clinicians evaluate the differences between the methods. The re-baseline will be at no additional charge to the patient.
