

## EXPANDING OUR TOXICOLOGY DEPARTMENT FOR COMMUNITY SAFETY

On March 5th, CompuNet's Toxicology Department is expanding! Our goal is to better serve our community by providing comprehensive testing for illicit substances. This expansion includes bringing testing in-house to reduce the total turnaround time due to testing that we currently are sending to our reference lab. We're committed to identifying substances that impact our area and adapting our test menu to emerging substances in the future.

The department will cover a wide range of relevant substances including

Drug Class	Test Code
ESZOPICLONE, LC-MS/MS	ZOPLC
KETAMINE, LC-MS/MS	KRTMLC
MITRAGYNINE, LC-MS/MS	KRTLCL
NITAZINES GROUP	NITZLC
▪ ISONITAZENE	
▪ PROTONITAZENE	
▪ N-DESMETHYL ISONITAZENE	
▪ N-PYRROLIDINE ISONITAZENE	
XYLAZINE, LC-MS/MS	XYLLC
ZOLPIDEM	ZOLPLC

The expansion of our Toxicology Department is just one piece of CompuNet's commitment to keeping our community safe, healthy, and informed.

## NAME CHANGE TO LAB TEST

Effective March 12, LAB6708 (Premier Prescription Drug Monitor w/Confirmation) will have a name change to read Prescription Drug Monitor w/Confirmation. No other changes to the test order or results are impacted. This name change will be reflected in Preference Lists and Order Sets. If a provider has this test saved on their personal preference list but had changed the display name for their ease of use, it will not receive the updated name change. The word Premier will be listed as a synonym in the search function.

### Searching for 'Premier' on Ambulatory Preference list:

The screenshot shows the 'Order Search' window with the search term 'PREMIER' entered. The 'Preference List' tab is selected. The search results are organized into several categories:

- Panels:** (No results found)
- After Visit Medications:** A table with columns: Name, Dose, Code, Route, Frequen..., Dis..., Dis..., Copay, Coverage, Formulary, Drug Type. One result is visible: 'Adult Disposable Diaper Brief (aka PREMIE...' with Code 54992 and Route Miscella...

- During Visit Procedures:** A table with columns: Code, Name. Two results are visible: 'CONJ0261 PREMIER ARTHRITIS & OSTEOPOROSIS CTR' and 'LAB6461 PREMIER HEALTH PRESCRIPTION DRUG SCREEN'.

Buttons at the bottom include 'Select And Stay', 'Accept', and 'Cancel'.

## Searching for 'Prescription' on Ambulatory Preference list:

The screenshot shows the 'Order Search' window with the search term 'PRESCRIPTION'. The results are categorized into 'Panels', 'After Visit Medications', 'After Visit Procedures', 'During Visit Medications', and 'During Visit Procedures'. The 'After Visit Procedures' section contains a table with the following data:

Name	Px Code	Type	Pref List
Prescription Drug Monitor w/Confirmation	LAB6708	Lab	PREMIER HEALTH AMB...
Immunotherapy prescription	IMO20	Procedures	PIP FAMILY PRACTICE...
Premier Health Prescription Drug Screen	LAB6461	Lab	PREMIER HEALTH AMB...

Buttons at the bottom include 'Select And Stay', 'Accept', and 'Cancel'.

Ordering screen remains the same:

The screenshot shows the 'Prescription Drug Monitor w/Confirmation' ordering screen. The 'Class' is set to 'Reference Lab'. The 'Source?' is 'Clean Catch Midstream' and the 'Type?' is 'Urine'. There are five 'Prescribed Drug' fields, all set to 'Not Given'. The 'Release to patient' is set to 'Immediate' with the option 'Manual release only'. The 'Date to be Collected' is empty. The 'Status' is 'Normal'. The 'Phase of Care' is 'Recipient'. Buttons at the bottom include 'Accept' and 'Cancel'.

The screenshot shows the 'Orders' window with the 'Medication Management' tab selected. It displays a list of 'Outpatient Procedures Ordered This Visit' with the following details:

- Procedure: PRESCRIPTION DRUG MONITOR
- Date: 2/23/2024
- Authorized by: RUFF, MELINDA LEE

Buttons at the bottom include 'Close', 'Previous', and 'Next'.
