

BLOOD TYPING

About This Test

Blood Typing (ABO Group, Rh Factor) - Blood Types are based on antigens (specific carbohydrates or proteins) on the surface of red blood cells. People whose red blood cells have A antigens are blood type A and those with B are blood type B. Those with both A and B antigens are AB blood type and those with neither A or B antigens are blood type O.

If an Rh protein is present on the red blood cells the individual is Rh+ (positive). If it is not present it is Rh- (negative).

Blood Typing is important and is used in determining compatibility if a transfusion of blood or blood components is ever necessary.

What Should I Do With My Results?

The results of blood typing will determine if a person is type A, B, AB, or O and if the person is Rh negative or positive.

How Do I Obtain My Results?

Results are available through our online patient portal, My Labs NowSM. Visit www.compunetlab.com to sign in or setup an account. Or text MYLABS to 66349. Follow The signup link in the text message you receive. Please be sure your name exactly matches the name on your lab test order. Contact help@luminarehealth.com if you need assistance. CompuNet is unable to provide verbal results to patients.

I Do Not Have a Regular Doctor. Where Can I Find One?

If you do not have a doctor, we recommend the following resources to locate one:

Premier Health Find a Doctor
(937) 684-4155 or 1-855-PREMIER
www.premierhealth.com/findadoc

WebMD Care
www.doctor.webmd.com

CompuNet DIRECT is direct access, preventative testing intended for education purposes. A CompuNet DIRECT lab test result is not a medical diagnosis and is not intended as a form of medical advice. Only a physician can interpret lab test results and diagnose a medical condition or disease.

Because tests have not been ordered by a physician, third-party entities, including Medicare and Medicaid, will not reimburse for these tests.
