

FOOD ALLERGY PANEL

About This Test

The Food Allergy Panel includes 17 allergens: Egg white, Milk, Codfish, Wheat, Peanut, Soybean, Shrimp, Walnut, Corn, Sesame seed, Clam, Scallop, Hazelnut, Cashew nut, Almond, Tuna, and Salmon.

This test detects IgE antibodies to each of the foods listed above. IgE antibodies are immune proteins associated with allergic reactions. The presence of IgE antibodies may indicate an allergy to a specific food.

What Should I Do With My Results?

A negative test result indicates that IgE antibodies for food allergens have not been detected.

A positive test result indicates that there is an elevated IgE antibody for a specific food allergen. However, an individual may or may not have symptoms as a result of this elevated IgE level. Consultation with your physician is recommended.

How Do I Obtain My Results?

Results are available through our online patient portal, My Labs NowSM. Visit www.compunetlab.com to sign in or setup an account. Or text MYLABS to 66349. Follow The signup link in the text message you receive. Please be sure your name exactly matches the name on your lab test order. Contact help@luminatehealth.com if you need assistance. CompuNet is unable to provide verbal results to patients.

I Do Not Have a Regular Doctor. Where Can I Find One?

If you do not have a doctor, we recommend the following resources to locate one:

Premier Health Find a Doctor

(937) 684-4155 or 1-855-PREMIER
www.premierhealth.com/findadoc

WebMD Care

CompuNet DIRECT is direct access, preventative testing intended for education purposes. A CompuNet DIRECT lab test result is not a medical diagnosis and is not intended as a form of medical advice. Only a physician can interpret lab test results and diagnose a medical condition or disease.

Because tests have not been ordered by a physician, third-party entities, including Medicare and Medicaid, will not reimburse for these tests.
