

## FREE THYROXINE (FT4)

### **About This Test**

Free thyroxine (Free T4 or FT4) is the portion of T4 hormone not bound to proteins in the blood. Testing Free T4 levels help evaluate thyroid function more accurately than total T4.

This test can be ordered to evaluate thyroid function in cases of suspected thyroid hormone abnormalities or to monitor thyroid hormone replacement therapy.

### **What Should I Do With My Results?**

It is always recommended that you meet with a doctor to determine what your laboratory test results mean to you. Your doctor will review all of your test results and, combined with your health history, will be able to provide an accurate picture of your health status.

Low levels of FT4 in blood may suggest hypothyroidism, leading to symptoms like fatigue, weight gain, or depression.

High levels of FT4 in blood could indicate hyperthyroidism, causing symptoms like weight loss, palpitations, or anxiety.

### **How Do I Obtain My Results?**

Results are available through our online patient portal, My Labs Now<sup>SM</sup>. Visit [www.compunetlab.com](http://www.compunetlab.com) to sign in or setup an account. Or text MYLABS to 66349. Follow The signup link in the text message you receive. Please be sure your name exactly matches the name on your lab test order. Contact [help@luminatehealth.com](mailto:help@luminatehealth.com) if you need assistance. CompuNet is unable to provide verbal results to patients.

### **I Do Not Have a Regular Doctor. Where Can I Find One?**

If you do not have a doctor, we recommend the following resources to locate one:

**Premier Health Find a Doctor**  
(937) 684-4155 or 1-855-PREMIER  
[www.premierhealth.com/findadoc](http://www.premierhealth.com/findadoc)

**WebMD Care**
