

## GROWTH HORMONE

### **About This Test**

Growth hormone is produced in the pituitary gland and is essential for growth and development. This test helps identify growth hormone deficiency, monitor growth hormone replacement therapy, or detect conditions like pituitary tumors.

This test can be ordered to diagnose growth disorders in children or evaluate pituitary gland function in adults.

Note: Due to the intricate nature of the analysis involved, results for this test may require additional time for processing. Results will be available in approximately 2 – 3 days.

### **What Should I Do With My Results?**

It is always recommended that you meet with a doctor to determine what your laboratory test results mean to you. Your doctor will review all of your test results and, combined with your health history, will be able to provide an accurate picture of your health status.

Abnormal growth hormone levels could suggest problems like excessive growth in children or enlargement of certain body parts in adults if there's too much, and growth delays in children or symptoms like fatigue and weight gain in adults if there's too little.

### **How Do I Obtain My Results?**

Results are available through our online patient portal, My Labs Now<sup>SM</sup>. Visit [www.compunetlab.com](http://www.compunetlab.com) to sign in or setup an account. Or text MYLABS to 66349. Follow The signup link in the text message you receive. Please be sure your name exactly matches the name on your lab test order. Contact [help@luminatehealth.com](mailto:help@luminatehealth.com) if you need assistance. CompuNet is unable to provide verbal results to patients.

### **I Do Not Have a Regular Doctor. Where Can I Find One?**

If you do not have a doctor, we recommend the following resources to locate one:

**Premier Health Find a Doctor**  
(937) 684-4155 or 1-855-PREMIER  
[www.premierhealth.com/findadoc](http://www.premierhealth.com/findadoc)

**WebMD Care**  
[www.doctor.webmd.com](http://www.doctor.webmd.com)
