

H. PYLORI

About This Test

H. Pylori BreathID® - This test is used to diagnose an infection with Helicobacter pylori. These bacteria increase the risk of developing peptic ulcers, stomach inflammation (gastritis), and if left untreated, gastric cancer.

What Should I Do With My Results?

A negative test result means that it is unlikely an individual has an H. Pylori infection. Signs and symptoms, if experiencing, may be due to another cause.

A positive test result indicates that an individual's signs and symptoms are most likely caused by Helicobacter pylori. It is recommended to follow up with a healthcare provider for treatment.

Test Information

CompuNet's testing is performed by an FDA-approved urea breath test BreathTek® and tested via an infrared spectrophotometry method.

How Do I Obtain My Results?

Results are available through our online patient portal, My Labs NowSM. Visit www.compunetlab.com to sign in or setup an account. Or text MYLABS to 66349. Follow The signup link in the text message you receive. Please be sure your name exactly matches the name on your lab test order. Contact help@luminarehealth.com if you need assistance. CompuNet is unable to provide verbal results to patients.

I Do Not Have a Regular Doctor. Where Can I Find One?

If you do not have a doctor, we recommend the following resources to locate one:

Premier Health Find a Doctor

(937) 684-4155 or 1-855-PREMIER
www.premierhealth.com/findadoc

WebMD Care

CompuNet DIRECT is direct access, preventative testing intended for education purposes. A CompuNet DIRECT lab test result is not a medical diagnosis and is not intended as a form of medical advice. Only a physician can interpret lab test results and diagnose a medical condition or disease.

Because tests have not been ordered by a physician, third-party entities, including Medicare and Medicaid, will not reimburse for these tests.
