

RESPIRATORY ALLERGY PANEL

About This Test

The Respiratory Allergy Panel includes 27 allergens:

Grasses/Weeds: Bermuda Grass, Timothy Grass, Common Ragweed, Common Pigweed, Russian Thistle, Sheep Sorrel

Trees: Elm, Walnut, Pecan/Hickory, White Oak, Sycamore, White Ash, Birch, Mountain Cedar, White Mulberry, Cottonwood, Maple/Box Elder

Molds: Aspergillus fumigatus, Alternaria alternata, Cladosporium herbarium, Penicillium chrysogenum

Insects: Cockroach, D. pteronyssinus (dust mite), D. farina (dust mite)

Danders: Cat, Dog

Other: Mouse urine proteins, Total IgE

This test detects IgE antibodies to each of the respiratory allergens listed above. IgE antibodies are immune proteins associated with allergic reactions. The presence of IgE antibodies may indicate an allergy to a specific allergen.

What Should I Do With My Results?

A negative test result indicates that IgE antibodies for respiratory allergens have not been detected.

A positive test result indicates that there is an elevated IgE antibody for a specific allergen. However, an individual may or may not have symptoms as a result of this elevated IgE level. Consultation with your physician is recommended.

Test Information

CompuNet's testing is performed by an FDA approved IgE-specific fluoroenzyme immunoassay method. ImmunoCAPTM.

How Do I Obtain My Results?

Results are available through our online patient portal, My Labs NowSM. Visit www.compunetlab.com to sign in or setup an account. Or text MYLABS to 66349. Follow The signup link in the text message you receive.

Please be sure your name exactly matches the name on your lab test order. Contact help@luminatehealth.com if you need assistance. CompuNet is unable to provide verbal results to patients.

I Do Not Have a Regular Doctor. Where Can I Find One?

If you do not have a doctor, we recommend the following resources to locate one:
