

KRATOM (MITRAGYNINE)

About This Test

This test is a urine drug test to check for the presence of Mitragynine, also known as Kratom, a tropical plant from Southeast Asia whose leaves are used for their stimulant and pain-relieving effects. Kratom's increased use for self-treatment of pain, anxiety, and opioid withdrawal has raised concerns about its potential for abuse and addiction. This drug is typically found the form of a capsule, tablet, or extract, which can be used in vaping solutions. This is a legal substance that is readily available.

What Should I Do With My Results?

It is always recommended that you meet with a doctor to determine what your laboratory test results mean to you. Your doctor will review all of your test results and, combined with your health history, will be able to provide an accurate picture of your health status.

Positive results in a urine drug screen could indicate compliance of prescribed medications or recent use of other medications which can suggest misuse of prescription medications, illicit drug use, or potential substance abuse, and may require further evaluation or intervention.

How Do I Obtain My Results?

Results are available through our online patient portal, My Labs NowSM. Visit www.compunetlab.com to sign in or setup an account. Or text MYLABS to 66349. Follow The signup link in the text message you receive. Please be sure your name exactly matches the name on your lab test order. Contact help@luminarehealth.com if you need assistance. CompuNet is unable to provide verbal results to patients.

I Do Not Have a Regular Doctor. Where Can I Find One?

If you do not have a doctor, we recommend the following resources to locate one:

Premier Health Find a Doctor
(937) 684-4155 or 1-855-PREMIER
www.premierhealth.com/findadoc

WebMD Care
www.doctor.webmd.com

CompuNet DIRECT is direct access, preventative testing intended for education purposes. A CompuNet DIRECT lab test result is not a medical diagnosis and is not intended as a form of medical advice. Only a physician can interpret lab test results and diagnose a medical condition or disease.

Because tests have not been ordered by a physician, third-party entities, including Medicare and Medicaid, will not reimburse for these tests.
