

Vitamin D Testing (CPT 82306)

- **82306** – 25 Hydroxyvitamin D (D2, D3, Total)

When CPT 82306 is Covered

Testing is covered when the patient has a condition associated with vitamin D deficiency or decreased bone density. Covered indications include:

- Malabsorption syndromes (celiac disease, Crohn's, ulcerative colitis, pancreatic steatorrhea, intestinal malabsorption)
- Liver & biliary disorders (cirrhosis, biliary disease)
- Bariatric surgery (history or planned)
- CKD Stage III–V or ESRD
- Calcium abnormalities (hypercalcemia, hypocalcemia, parathyroid disorders)
- Bone disorders (osteoporosis, osteomalacia, osteopetrosis, osteogenesis imperfecta, rickets)
- Sarcoidosis, tuberculosis, systemic lupus erythematosus
- Long term steroids or anticonvulsants
- Eating disorders, malnutrition, myopathy, dermatomyositis

Repeat Testing Rules

- Repeat testing allowed ≥ 12 weeks after starting supplementation.
- Up to 2 tests per year until therapeutic target reached; annually thereafter.

Covered ICD 10 Codes for CPT 82306

Liver/Biliary: K74.3, K83.1, K83.8, K83.9

Malabsorption/IBD: K90.0, K90.3, K90.9, K50.00, K50.90, K51.90

Calcium/Parathyroid: E83.51, E83.52, E83.59, E21.0–E21.5, E20.0–E20.9

Kidney Disease: N18.30–N18.6

Bariatric Surgery: Z98.84, Z68.30–Z68.39

Bone Disorders: M80.00XA, M81.0, M81.8, M81.9, M83.0, M83.9, Q78.0, Q78.2, E55.0, E55.9

Malnutrition/Eating Disorders: E40–E46, F50.00–F50.9

Muscle/Myopathy: M79.1, M60.80, M60.9, G73.7, M33.00–M33.90

Sarcoidosis/TB/SLE: D86.0–D86.9, A15.0–A19.9, M32.10, M32.9

Neoplastic Hematologic: C81.90, C90.00, C92.00

Non Covered Situations

- Routine screening in asymptomatic individuals
- General wellness visits

Summary: CPT 82306 is covered only when clinical indications and diagnosis codes support medical necessity.
